## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The composition comprises at least one compound selected from the formulae (I-1)-(I-5), or combination thereof. The compounds of the formulae (I-1)-(I-5) and subsets within the formulae (I-1 to I-5) have different chemical structure.

Applicant is required, in reply to this action, to elect a single species (a single composition including each formula compound) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1756

2. The claims are deemed to correspond to the species listed above in the following manner:

Group 1; Claims 1-4 and 13-18 drawn to the composition comprises at least one form (I-1 to I-5).

Group 2, Claims 1 and 5-8 drawn to the composition comprises at least one form (I-1 to I-5) and at least one from component B (II-1 to II-4).

Group 3, Claims 1 and 9-12 drawn to the composition comprises at least one form (I-1 to I-5) and at least one from component C (III-1 to III-4).

The following claim(s) are generic: Claim 1.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The each compound of formulae I-1 to I-5 not only has different chemical structure also has different liquid crystal properties. See the chemical structure listed from page 29 to page 154 for compound represented by formulae I-1 to I-5, and components B and C in the specification.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
